Summary of Modifications to SMART in Version 10.0
March 09 Release – Release Date 4/10/2009

These two tables summarize the major changes for users in SMART Version 10.0.

There are several changes in the new version to provide greater functionality to the user, summarized below.

Module Affected	Description
MCASP (DJS assessment)	When the user clicks "Save" or "Finish" and one or more questions is incomplete, SMART will prompt with "The MCASP is incomplete, you will not be able to finalize your intake decision until the MCASP is complete. Are you sure you want to Save or Finish?" The user can choose a Yes or No button, where clicking Yes will follow the same logic as the button they pressed to get the message (Save or Finish) and No will take them back to the assessment.
Client Intake	The Presenting Problems mover box is now optional (not shaded).

There are several changes which make fields mandatory which were formerly optional, as detailed below.

Module Affected	Description
Discharge (ADAA)	On the status changes since admission, number of days attended AA/NA/Similar, Education, and Veteran Status are required for ADAA reporting. (fields are light yellow)
Client Intake	Presenting Problems (in own words) is now required for state reporting (light yellow).
