

**Summary of Modifications to SMART in Version 10.7 (October 2009 Release)
Release Date November 9, 2009**

This table summarizes the major changes for users in SMART Version 10.7.

Several modules change in the new version to provide greater functionality to the user, as summarized below.

Module Affected	Description
Oversight Privileges	Create a new role to allow users with oversight privileges to run certain reports.
OPSC Agency Reporting Export Files	On the OPSC submission and extraction files, date created and date modified are added to assist drug courts and OPSC with reconciling their data.
Department of Juvenile Services (DJS) Needs Assessment	<ol style="list-style-type: none"> 1. Add two fields and three code cibles to the DJS Needs Assessment. 2. Make changes to Questions 13 and 14 and update the scoring. 3. Revise the blank form for Question 2. 4. Update Needs Assessment Detailed Report and Summary Report with risk calculation changes.
DTMS	<p>There are several changes to the new automated drug testing management system, which was released to Montgomery County and Department of Parole and Probation this fall. The changes are:</p> <ol style="list-style-type: none"> 1. DTMS Specimen Retest Report – Change to start all new batches on a new page, rather than all new specimens on a new page. This will results in fewer printed pages on the report. 2. Allow user to enter “rejected” and a reason after a “shipped to lab” event. 3. DTS Lab – changes to improve performance 4. DTS Lab – Changes on the Specimen detail screen, batch submission and batch scoring screens to improve functionality. 5. DTMS Scheduler – Allow scheduler to run even if no days exist on calendar.

Other modifications fix items in previous releases, as summarized below.

Module Affected	Description
Provider Appointments Screen	This release corrects an issue where an oversight user could not exit this screen. A message “invalid date and format” appeared.
Admission Module (treatment)	The “Days waiting to enter treatment” field did not appear on the HTML Screen Report. This release adds that field to the report.
BSAS Scheduler	This release allows a provider to change the status of an appointment even if it is an occurrence of a recurring appointment.
