

Summary of Modifications to SMART in Version 11.0.3 (December 2009 Release)
Release Date January 29, 2010

This table summarizes the major changes for users in SMART Version 11.0.3.

Several modules change in the new version to provide greater functionality to the user, as summarized below.

Module Affected	Description
Intake for DJS only	The agency Maryland Dept of Juvenile Services moved from an agency model with multiple intake facilities to one with only one intake facility, labeled single intake facility. Episodes of care will be at this single intake facility. See “DJS Facilities” below for additional information.
DJS Needs Assessment	The DJS Needs Assessment is now moved to be part of an episode of care (under the intake). It therefore will appear on the Client Activity List and is now a consentable activity.
DJS Facilities	The DJS risk assessment, needs assessment, reassessment, and eCourt case management activity now must be assigned to specific DJS facilities. For the Drug Test Results screen and the eCourt Court and Other Justice screen, only allow the staff person’s “allowed facilities” to appear as choices.

Other modifications fix items in previous releases, as summarized below.

Module Affected	Description
DJS Treatment Service Plan	Allows the user to cancel a planned service without error.
DJS Needs Assessment	Some rules and questions in the Needs Assessment were modified to better meet DJS needs.
DTMS (Drug Testing Management System)	Modifications to improve the speed and functionality of DTMS in SMART.
OPSC Report	Add client group enrollment and intake case history to the list of files that can be viewed and exported from OPSC reporting.
eCourt Court and Other Justice	Allow the user to select whether to release the notes associated with an event. User may check a box to either allow or not allow sharing across agencies, when eCourt case management is a consented activity.
Admission (substance abuse)	Days on waiting list is now back on the admission screen.
