

Summary of Modifications to SMART in Version 11.3.1 (March 2010 Release)
Release Date April 16, 2010

This table summarizes the major changes for users in SMART Version 11.3.1.

A module changes in the new version to provide greater functionality to the user, as summarized below.

Module Affected	Description
Admission - Program Enrollment	SMART is upgraded so that the TEDS and NOMS can be turned on in a future release on the enrollment and disenrollment screen. At this point, however, TED and NOMS data are not visible to users.

Other modifications fix items in previous releases, as summarized below.

Module Affected	Description
Treatment Plan	Makes problems and goals required fields (dark yellow).
DTMS – BAC field	Corrects the issue where BAC could be entered on the screen, but then was not stored with a sample. Now, when BAC is entered through the DTMS automated system, the level remains stored with the specimen and visible on the screen.
Client Profile – Other Number – DJS Petition Number	Corrects a misspelling on an error message when a DJS petition number is entered with the incorrect format.
