Summary of Modifications to SMART in Version 11.7.0 (July 2010 Release)
Release Date August 13, 2010

This table summarizes the major changes for users in SMART Version 11.7.0.

Several modules change in the new version to provide greater functionality to the user, as summarized below.

Module Affected	Description
Referrals (In and Out)	Referrals in and out are now searchable by Client First Name, Client Last Name, Client ID, and Created Date and Referred Date.
Agency Reporting – OPSC Submission	The Agency Reporting process has been optimized so that it runs more efficiently for all agencies. This improvement will be most evident in agencies with large quantities of drug tests or treatment encounters.
Encounter notes	The encounter notes search screen, released in July 2010, has been modified. Now, the user enters only the start date and end date to search (entering <= or >= is no longer required).
