

**Summary of Modifications to SMART in Version 11.8.0 (August 2010 Release)**  
**Release Date September 10, 2010**

This table summarizes the major changes for users in SMART Version 11.8.0.

**Several modules change in the new version to provide greater functionality to the user, as summarized below.**

Module Affected	Description
<b>Discharge</b>	Pregnancy status at discharge for female clients now defaults to blank.
<b>Client Progress Report and Summary Progress Report</b>	Drug court phase date is now the most recent date associated with a phase change. This phase date will also be used to calculate the number of days in phase.
<b>All modules</b>	The user may no longer click “back” or right click and choose “back” to navigate in SMART. These options were disabled because, if used, they can degrade system performance.
<b>Encounters Search</b>	Users with read-only oversight privileges were negatively impacted by the new search feature added to the encounter module. In this release, these users can now view encounters, and search for encounters within a time period, without difficulty.

**Some modules are added for future use. Training and implementation details will be provided at a later date.**

Module Affected	Description
<b>Fee Determination</b>	The fee determination and federal poverty screens were added to SMART, but will not be used at this time.
<b>Recovery Care Plan and Plan Review</b>	The menu nodes for Recovery Care Plan and Plan Review are turned on. Training and implementation details will be provided at a later date.

**Some changes affect only users at the MD Department of Juvenile Services, as summarized below.**

Module Affected	Description
<b>Needs Assessment/Reassessment</b>	Improve the error message if facility is not entered on the Needs Assessment/Reassessment. Add the Needs Domain Scores Table, Needs Assessment Output graph, Dynamic Needs Output graph, and Protective Factors Output graph to both DJS reassessment output reports. Finally, ensure that the recommended level of supervision appears regardless of delinquent history score value.
<b>Treatment Service Plan</b>	Improve the placement of columns on the intervention table and domain objects.
