

**Summary of Modifications to SMART in Version 12.7 (April 2011 Release)**  
**Release Date May 22, 2011**

This table summarizes the major changes for users in SMART Version 12.7.

**Several modules change in the new version to provide greater functionality to the user, as summarized below.**

Module Affected	Description
<b>Program Enrollment</b>	Users may now enter program enrollment start and end dates that are more than 5 years apart.
<b>Client Group Enrollment</b>	Where there is a contract in place with a facility, each client must have a client group enrollment in place before an intake can be created. This rule is now again enforced.
<b>Settings menu item</b>	Facilities within an agency will sort based on whether they are active or inactive. All inactive facilities will appear first in alphabetical order, preceded by "(Inactive)".

**Some modules affect only agencies involved with Access to Recovery, as summarized below.**

Module Affected	Description
<b>Client GPRA</b>	The GPRA interview can again be edited.
<b>SAIS</b>	Implemented a way to notify FEI Support if the upload fails, is rejected or response is not received.
<b>Authorization</b>	When a service is added to a referral voucher and saved, send an email to the Provider contact in the contract profile. The email will be titled Notice of ATR Authorization and will include the following fields: start and end date of the authorization, number of units, service and Client ID.
<b>Authorization List</b>	When displaying the authorization list, determine if the agency has a contract with any of the following key activities: create local voucher, create referred voucher, create provisional local voucher, or create provisional referred voucher instead of looking at the case manager indicator on the Agency Profile to determine if an agency is a case manager. If an agency does not have these key activities, they will only be able to view their own authorizations.
<b>Intake</b>	Three special initiatives have been added to this screen for ATR. If a care coordinator enters an ATR client for another agency, the coordinator will use this feature to flag where the client originated.
<b>Authorization List</b>	The "provisional" voucher feature has been enabled for ATR vouchers in Maryland.

**Some changes affect only users at the MD Department of Juvenile Services, as summarized below.**

Module Affected	Description
<b>DJS Treatment Service Plan</b>	Modify language on some existing fields and add new fields the DJS Treatment Service Plan/Placement & Permanency screen, Treatment Service Plan Profile, and Planned Services Screen to comply with Title IVE Requirements.
<b>DJS Treatment Planning Output Report</b>	Modify the field labels and add new field labels to the DJS Treatment Service Plan Output Report to match the modifications made to the screens (see: 8512, 8514 and 8629).
<b>DJS Treatment Planning/Court Ordered Conditions</b>	Bug fixed to allow a Court Ordered Condition to be saved without requiring an "Actual Achievement Date".
