Summary of Modifications to SMART in Version 12.8 (May 2011 Release)
Release Date June 17, 2011

This table summarizes the major changes for users in SMART Version 12.8.
Several modules change in the new version to provide greater functionality to the user, as summarized below.

Module Affected	Description
Treatment Review	Implemented change to ensure that when user applies the changes from a treatment review, a new treatment plan is always generated. In addition, the treatment review status will now be updated after the new treatment plan is generated, rather than before.
eCourt Case Management	eCourt Case Management records can now be saved with the Event Type field blank without throwing an error message. For Maryland users, however, this field should always be completed.
Removed Consents	Implemented change to ensure that the user does not receive an error when searching for removed consent records.
Intake	Users will no longer get a yellow screen when attempting to move from an unsaved intake to the encounter or discharge screen. Instead, they will receive a message stating "you must save or cancel your changes."
Referrals	Multiple referrals to the same facility are again allowed. This feature was disallowed for the last few releases, but is now allowed for non-ATR facilities. This allows an agency to re-refer a client who may have been referred much earlier and rejected by the referred to agency.
Treatment Review	The treatment team review sign off process is changed. Most staff can now only click the sign off button next to their own name. Clinical supervisors and WITS administrators may sign off for any team member. The name of the staff who signed off appears is the "Approved by" column after signoff.
Waitlist	The "reason" and "Removed from wait list by" field on the Wait List Screen now become dark yellow (required) when the "Wait List End Date" field is completed.
Oversight	The oversight read-only role has been modified to allow users to search and view encounters and drug test results.
eCourt Discharge	Users can now delete eCourt discharge records. However, if there is an active OPSC submission, that submission must be deleted before the eCourt discharge can be deleted.
Follow up TAP	Users can now peform a follow-up TAP even if there is no admission for the client..
Profile (Client Group Enrollment – CGE)	For government contract enrollments, the screen was modified as follows: - the first dropdown is for contract - a single Plan-Group dropdown replaced separate Plan and Group dropdowns.

Some modules affect only agencies involved with Access to Recovery, as summarized below.

Module Affected	Description
Payor adjudication	An extract has been built to allow for finalized adjudicated batches to be sent via email to Value Options. A list screen allows users to view prior submission or resubmit if needed.

Some changes affect only users at the MD Department of Juvenile Services, as summarized below.

Module Affected	Description

Education/Assessments	If BASI - Basic Achievement Skills Inventory is selected as the type of assessment, then the 'Subject Area' field is now required.
DJS Treatment Service Plan	TSP was modified to not allow the same objective to be selected in the same TSP more than once.
MCASP Risk Assessment	If user has DJS Supervisor permission, a new action is available – Delete, allowing the user to delete a Risk assessment.
DJS Education Services	The field "List Current Courses and Grades" is no longer a required field.
DJS Treatment Service Plan	Three questions regarding client and parent participation in the TSP have been removed.
DJS Supervision Module	Three options were added to the Recommended Level of Supervision: VPI Level I, VPI Level II, VPI Level III.
MCASP Needs Assessment	The bug in the Needs Assessment relating to the syncing process for Delinquency History has been fixed.
